# Woodside Primary School

Internet Safety Day 2022

The theme for this year's Internet Safety Day is 'All fun and games? Exploring respect and relationships online.'

Internet Safety Day is a global event promoting the safe and positive use of digital technology.

The UK Safer Internet Centre has lots of resources and advice to support parents and carers.
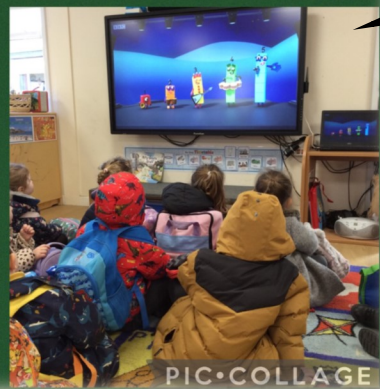

Safer Internet Day 2022 - UK Safer Internet Centre

Nursery

What the children say...

I ask to go on the computer at home. I can't turn it on because there is a password.

I play games on my tablet, dinosaur games.

I share an old computer with my brother. To turn it on you press the middle button.

I got a blue tablet and I watch Sonic on it.

What do we use the internet for on the interactive whiteboard at Nursery?

"We watch Numberblocks and Alphablocks."

"Mr Tumble songs, dancing songs and yoga."

"I like it when we watch The Gruffalo and Zog."

"To look at pictures of things we have done at home and tell our friends about."

My mummy puts Peppa Pig on for me and I play games.

What can you do if you're scared by something you see on your tablet?

"At home, if I see monsters on the tablet, I tell Mummy and Daddy because I don't like monsters."

"I said to my teacher I didn't like the lava song and now we don't do that one anymore."

Can we find more pictures of leopards on the iPad please?

Reception

In Reception we talked about Internet Safety Day and created our own actions to remind us of what to do.

Asking an adult to use the internet.

Telling an adult if something pops up on the screen.

Using the mouse or screen to stay on what the adult has put us on.

Dinosaur action to remind us to use the KidRex search engine.

We can use the computers safely in class.

Year 1

In Year 1, we focused on learning what to do if we felt unsafe when using the internet. We looked at unexpected messages, unkind behaviour online and how we shouldn't use a device without the permission of an adult. We used our learning to create a poster or handy bookmark.

Year 2

In Year 2, we learned about how we can stay safe when using different devices by following the SMART rules. We read the story of Smartie the penguin and then used Purple Mash programme '2create a story' to make our own books about how to stay safe when using the internet.

Year 3

In Year 3, we enjoyed discussing our favourite things that we do online and completed our digital footprint design using these ideas. Also, we listened to the virtual assembly which celebrated 'Safer Internet Day 2022.' The assembly led to some thoughtful discussion in our classes on its theme of respect and exploring relationships with our friends online. Finally, we completed the quiz based on this assembly and all our classes gained 100%. We are now internet safety experts!

Year 4

In Year 4, we focused on gaming online as this is what a lot of us like to do in our free time. We looked at different online scenarios someone playing a game online might face, and we discussed appropriate and inappropriate responses. We worked in groups to discuss our ideas and feed these back to the rest of the class.
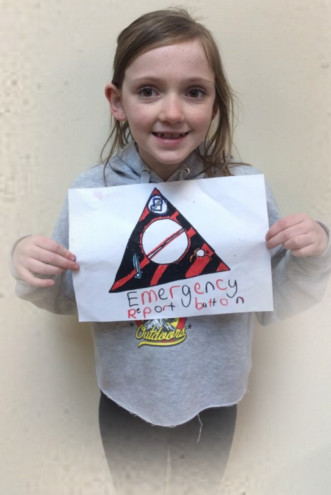

Year 5

To promote Safer Internet Day in Year 5, we have been thinking about different uses for the internet and how we can ensure we are safe when using it.

We started the lesson by looking at a screenshot of an online game and identified any potential risks on the site; we were also able to suggest different steps we could take to avoid these risks. We then started to look at different scenarios that could take place online, and discuss how we would feel and what we would do if we were in that situation.
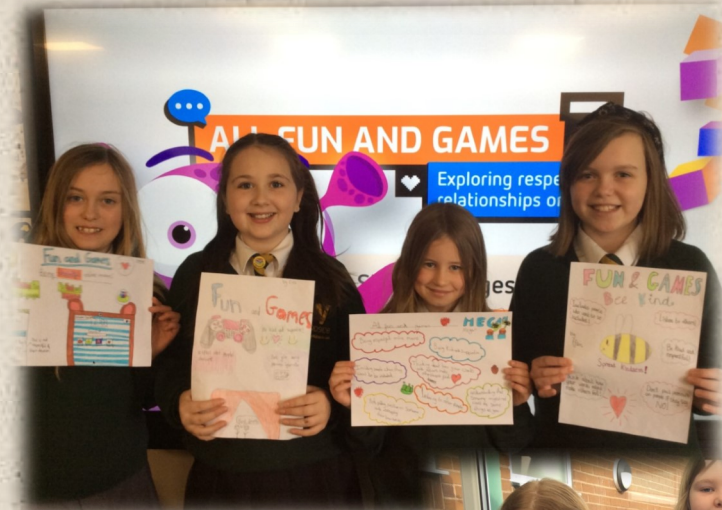

We all designed a new symbol to be placed online, which could be pressed if we ever felt uncomfortable in anyway when using the internet.

Here are some pictures of the symbols that we designed.

Year 6

In Year 6, we watched a virtual assembly and played 'Game On' - we had to choose the most respectful responses for different scenarios about gaming. Then they created posters about respectful relationships in the gaming world.

Bad language online is unacceptable and should never be used. This is harmful and upsetting to some people and could get you into serious trouble—Martha.

I think that going on the internet is important because you can learn things easily but it is also quite dangerous because you never know who you are talking to—Amelia.

I have learnt in Internet Safety Week that you should never share your personal information online and always think before you speak. I think it is important because there are so many people are on the internet and you never know who they are – Elliot.

Thank you for working in partnership with us to keep our children safe online.
