

Year 3

Autumn Term

P.E.

In P.E., the children will develop the fundamental skills of balancing, running, jumping, hopping and skipping. They will also take part in outdoor adventurous activities and develop problem solving skills through a range of challenges. Later in the term, children will develop their ball skills and fitness.

P.S.H.E. & C.

In P.S.H.E. & C. this term, we will begin by looking at Zones of Regulation and learning how to regulate their emotions. Then, the focus will be on family and relationships and they will understand how to respect differences in others, and how to create

Computing

This term in computing, the children will be recognising what a network is, demonstrating how information moves around a network and how a website works.

R.E.

The children will be looking at some extracts from the Old Testament and gaining an understanding of what it is like for Christians to believe in God. They will also learn about the Trinity and what it means to Christians.

D&T

In D&T, the children will be investigating wearable technologies. They will complete product analysis on a range of wearable devices, both old and new before designing their own. They will then produce a campaign to try and sell this device.

Science

In science this term, children will be naming and identifying the bones in a human body and learning about the functions of a skeleton. Children will investigate animals with and without a spine. Later on in the term, children will explore and investigate the properties of rocks and their uses.

Art

In art, the children will be introduced to cave art and reflect upon the purpose of the drawings. Children will develop their sense of proportion in drawing. They will learn to use charcoal, to create tones and texture.
